Vanesa Reche

Product Designer · UX/UI

Buenos Aires, Argentina · vreche.ux@gmail.com · linkedin.com/in/vanesa-reche · vrecheux-coder.github.io/portfolio

PROFILE

Product Designer with 5 years of experience in digital products, built on a ten-year background in graphic design. I specialize in complex B2B SaaS products: self-serve growth, data tools and design systems. I work end to end, from discovery and user research through hand-off and measuring results, making evidence-based decisions with Product, Engineering and Business. I bring generative AI into my design process.

EXPERIENCE

UX/UI Designer — Jan 2025 – Jul 2026

Flowics, a startup later acquired by Vizrt — B2B SaaS live graphics platform for media and broadcast

- **Product-Led Growth:** as the sole designer, led the shift from a sales-led model to self-serve: public pricing, free trial, plan and add-on selection, feature gating, checkout and subscription lifecycle. Publicly launched at NAB Show 2025. **Result: +30% leads.**
- **Discovery and research:** planned and ran interviews, surveys, moderated and unmoderated usability tests, card sorting, tree testing and A/B tests to validate hypotheses before development.
- **Design System:** designed, documented and evolved reusable components in Figma, and aligned Storybook components with Figma together with Engineering.
- **Collaboration and AI:** validated technical feasibility with Engineering from low fidelity and presented design decisions to stakeholders across global teams (Agile, Jira). Used Claude, ChatGPT and Figma Make to speed up research, ideation and prototyping.

UX/UI Designer — Aug 2023 – Jan 2025

Flowics (Vizrt)

- **Data Augmentation:** as the sole designer, designed a bulk data editing system through Google Sheets, with a simulation of every change before import and full import traceability. Validated with 15 users. **Result: 60% fewer steps to complete the task.**
- **Custom Fonts:** designed self-serve custom font upload, with family and variant management and plan-based feature gating, validated with 5 users. **Result: more upgrades to the Basic plan and fewer support tickets.**
- Ran heuristic evaluations and usability reviews, turning findings into prioritized improvements with Product.

Visual Designer — Nov 2021 – Aug 2023

Flowics (Vizrt)

- Designed UI elements and marketing assets with a high level of visual craft, working with product designers and developers.

Digital Designer — Mar 2021 – Nov 2021

Universal Assistance — Travel insurance

- Designed flows, wireframes, prototypes and responsive UI for web and mobile travel insurance sales.

Earlier experience: graphic and digital design roles in insurance and consumer brands.

SKILLS

UX and research: Product discovery, interviews, surveys, usability testing, heuristic evaluation, card sorting, tree testing, A/B testing, information architecture, user flows

UI and systems: Low- and high-fidelity prototyping, responsive design, Design Systems, component documentation, hand-off, accessibility (WCAG)

Product: Product-Led Growth, self-serve and checkout, onboarding, pricing, feature gating, metrics-driven decisions

Tools: Figma, Figma Make, FigJam, Storybook, Useberry, Jira, Confluence, Agile/Scrum, generative AI (Claude, ChatGPT)

EDUCATION AND CERTIFICATIONS

AI for Experience Design — Digital House — In progress

UX/UI Design Diploma — Universidad Tecnológica Nacional (UTN). Final project: Mi Argentina app redesign, with research involving 88 participants — Feb – Jul 2026

Bachelor's Degree in Graphic Design — Universidad de Morón — 2014 – 2017

WCAG Overview — Accessibility Testing Fundamentals · Assistive Technology — Introduction to Digital Accessibility — 2023
